Ontex expands U.S. training pant and diaper pant sizes to better serve families

Atlanta, United States, August 13, 2025 — Ontex Group NV [EURONEXT: ONTEX], a leading international developer and producer of personal care solutions, today announced the expansion of its diaper and training pant size range. Starting in 2026, Ontex will offer its retail partners training pants in size 5T/6T and diaper pants in sizes 3 through 7, providing improved comfort and advanced leak protection for every stage of development, from infancy to potty training.

With its expanded training and diaper pants lineup, Ontex allows its retail partners to meet the growing market demand for inclusive size ranges as birth weights [rise](#) and potty training milestones [shift](#). Although some children begin potty training as early as 18 months, the [American Academy of Pediatrics](#) reports that most children start between the ages of two and three and stay in training pants longer, highlighting the need for a wider size range for today's toddlers.

*"We are proud to introduce our extended range of diaper pants and training pants, delivering inclusive care for every child," stated **Paul Wood**, president of Ontex North America. "With this expansion, we're helping retailers better serve families with a comprehensive size selection, while providing parents with the affordable, dependable essentials they rely on to keep their children comfortable."*

With decades of experience in the personal care industry, Ontex is a trusted partner of parents and major retailers around the world. Guided by innovations in performance, comfort and value, Ontex continues to optimize its products for the evolving needs of modern families, supporting them through every step of early childhood.
